Directions : Read the following passage and choose the best answer for each question.

Color Vision

The nerves in the retina of a human eye are sensitive to three basic color areas: red / yellow, green, and blue. Some people, however, cannot see one or more of these colors. We say they are colorblind. A lot of people, especially men are "red blind", red and green look the same to them. A few people are "blue blind" they cannot see the difference between blue and yellow. Very few people are blind to all colors.

91. This text is mainly about.....
- a. the retina
 - b. human eyes
 - c. color vision
 - d. three basic color areas
92. Where is the retina?
- a. In colors
 - b. In human eyes

 - d. sensitive to all colors
94. From this text we know that there are.....kinds of colorblind.
- a. two
 - b. three
 - c. four
 - d. five
95. From the text, which one is **incorrect**?
- a. Most men are red blind
 - b. A lot of people are blind to all colors
 - c. Blue blind people cannot see the difference between blue and yellow
 - d. People are blind to some colors.

Dolphins

For many years scientists believed that the most interesting animals after man were chimpanzees. Now, however, there is evidence that dolphins may be even more intelligent than these big apes.

Although a dolphin lives in the sea, it is not a fish. It is a mammal. It is similar in many ways, therefore, to a human being.

Scientists have discovered that dolphins have a simple language. They are able to talk to one another. It may be possible for man to learn how to talk to dolphins. But this will not be easy because dolphins cannot hear the kind of sounds man can make. If man wants to talk to dolphins, therefore, he will have to invent a third language which both he and the dolphins can understand.

Dolphins are also very friendly towards man. They often follow ships. There are many stories of dolphins guiding ships through difficult dangerous waters.

96. What animals are believed to be the most intelligent animals after man?
- a. Monkeys
 - b. Dogs
 - c. Chimpanzees
 - d. Elephants
97. According to the evidence, what is probably the most intelligent?
- a. Big apes
 - b. Dolphins
 - c. Fish
 - d. Seal
98. Which is not a mammal?
- a. Cats
 - b. Dogs
 - c. Bats
 - d. Birds
99. How can dolphins talk to one another?
- a. They use English.
 - b. They use Chinese.
 - c. They use a simple language.
 - d. They use a fish language.
100. How can man talk to dolphins?
- a. By using human's language.
 - b. By using dolphin's language.
 - c. By using a third language invented by man.
 - d. By using mammals language.
